

Activity - Read the non-chronological report and answer the questions about Space

Shooting for the Stars

Where do we live?

We live on a planet called Earth. Our planet is covered in water and land. In the water there are lots of fish and sea creatures. We live on the land where we build houses, grow plants and look after animals.

1) What is our planet covered in?

2) What can be found in the water?

How many planets are in our solar system?

There are eight planets in our solar system. This means that there are seven other planets that move around the same sun as us here on planet Earth. Earth is the third closest planet to the sun.

3) How many planets are in our solar system?

4) How close is planet Earth to the sun?

What is the moon?

The moon moves around planet Earth and it controls our tides and the oceans. We still don't know if there is water on the surface of the moon.

5) Why don't we know much about the moon?
