

Thursday 4th June 2020    Counting in groups of five

Counting in groups can be a quick way of finding how many you have.

For example:    How many apples are there?

There are five apples in each bag, I can count in fives.

5      10      15      20

There are 20 apples altogether.

How many pencils are there?

There are five pencils in each pot. I can count in fives.

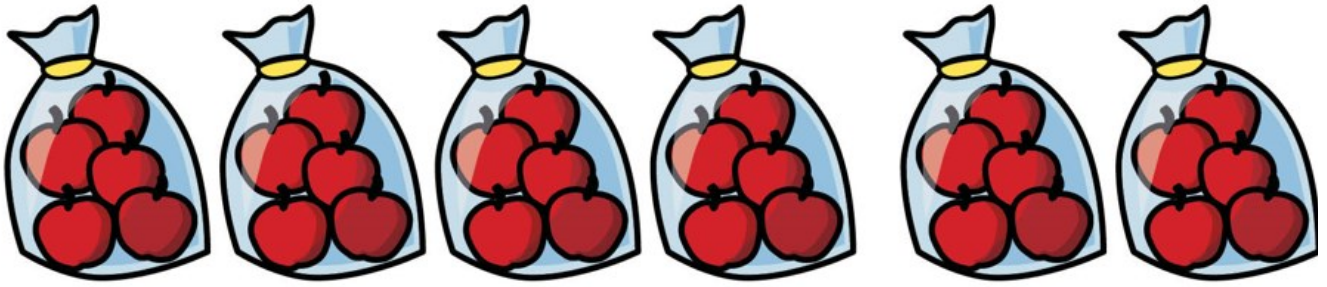

5      10      15      20      25

There are 25 pencils in the pots.

Thursday 4th June 2020 Counting in groups of five
